

## **GREEN CLEANING**

*~by Jeff Leahy, CWS parent*

Green cleaning may simply refer to using less harsh chemicals in the course of housekeeping tasks. But it really encompasses looking at the entire cleaning process and identifying ways to improve it. The choice of chemicals and the manner they are used along with effective cleaning equipment are several components for evaluation in a green cleaning program. Entryway mats are another component and can greatly reduce the amount of cleaning needed.

For a jump start and links to more on green cleaning on the internet look at the following: [www.wikipedia.org](http://www.wikipedia.org) and search "green cleaning"; for more detail go to: [www.ashkingroup.com](http://www.ashkingroup.com).
